

Spring dates for Biochem 910: **BOLD** = locked dates/speakers. (green) = tentative dates

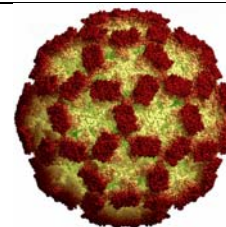

**Biochemistry 910 Advanced Molecular Virology
2018-2019**

12:10-1:00 PM Thursday

Biochemical Sciences Auditorium – (Rm 1211)

440 Henry Mall, U.W.-Madison

Seminar Coordinator: Ann Palmenberg (acpalmen@wisc.edu)

Date	Speaker	Title	Affiliation
Jan. 17	Ann Palmenberg	Organizational meeting Registered students only	Prof coordinator
Jan. 24	Anna Heffron	Exploring linear epitope antibody responses in flaviviral and unknown infections	VTP-predoc D. O'Conner lab
Jan. 31	This date is cancelled for anticipated bad weather	No class	
Feb. 7	Gloria Larson	The host factor EPS8 enhances influenza virus uncoating and replication	VTP-predoc Mehle lab
Feb. 14	Rob Kalejta	Does viral possession of a mechanism for genome survival during mitosis imply oncogenicity?	Prof, IMV & McArdle labs
Feb. 21	Hillel Haim	Identifying the order that underlies evolution of pandemic viruses	U of Iowa N. Sherer host
Feb 28	Ana Fernandez-Sesma	Immune modulation by dengue virus and beyond	Mt. Sinai, NY K. Bernard host
Mar. 7	Ryan Langlois	Early innate immune responses to influenza virus infections	U Minnesota A. Mehle host
Mar. 14	Adityarup Chakravorty		VTP-postdoc Sugden lab
Mar. 21	-	Spring Recess No class	
Mar. 28	Evan Glasgow		IPiB B Fox lab
Apr. 4	Tony Goldberg	Primate reverse zoonoses: unfortunate natural experiments in unchecked viral epidemiology and pathogenesis	Prof, PathoBio Sciences
Apr. 11	Paul Friesen		Prof, IMV & Biochemistry
Apr. 18	Nicolas Van Sciver		VTP-predoc Kenny lab
Apr. 25	Katia Koelle		Emory T. Friedrich host
May 2	Arturo Diaz		La Sierra University P. Ahlquist host
		END of SEMESTER
